Quasar Framework

SPA front-end on steroids.

Build responsive websites and hybrid mobile Apps

(that look native!) using same code, with VueJs.

Making a Mobile App...

- React Native
- NativeScript
- Cordova / PhoneGap
- Ionic / Framework7 / Onsen...

Features

- One source code for all platforms simultaneously
- Boilerplate
- Built-in Components
- Themes
- Dev Hot Reload
- Desktop and Mobile (Native Mobile Apps included)
- Full Stack Toolkit

Cross-Platform Code Gen.

"Write Once, Run Everywhere"

- One app to rule them all!

- Electron (Desktop) Apps
- Cordova (iPhone and Android) Apps
- Web (SPA / PWA)

Install

npm install -g quasar-cli

Demo Time

quasar init intro-to-quasar

cd intro-to-quasar

quasar dev

Platforms

- iOS: quasar dev -m cordova -T ios
- Android: quasar dev -m cordova -T android
- Electron: quasar dev -m electron -t mat
- PWA (Material UI): quasar dev -m pwa -t mat
- PWS (iOS): quasar dev -m pwa -t ios

Components

Quasar ships commonly-used components in 2 themes:

- Material UI: http://quasar-framework.org/quasar-play/android/index.html#/showcase
- iOS: http://quasar-framework.org/quasar-play/apple/index.html#/showcase
